PMP® Certification Preparation

Virtual Program 20 Apr to 22 June 2022

Requiring PMP certified project managers, organizations and individuals are seeing the value in consistent project management. Adopting strong project management processes increases productivity, reduces costs, enhances communication, and raises the stature of the organization.

Obtain an Internationally Recognized Certification

The Project Management Professional (PMP) Certification Examination Preparation Program provides a solid method for incorporating sound project management principles.

These principles are based on the Project Management Institute's (PMI) Project Management Body of Knowledge (PMBOK) – 7th Edition

Who Benefits from the PMP Certification

Ideally this is for you if you are a senior, practicing, full-time project manager who has demonstrated project management capability and need that final certification to prove your project management maturity and capability.

After taking this program, you have covered the material required for the Project Management Professional (PMP) certification exam.

To get the PMP you are encouraged to read the selected references and prepare by taking practice tests. The program provides guidance and an action plan for getting your PMP.

To Qualify for the PMP Certification Examination

Your must have:

- Bachelors degree (or global equivalent) and 36 months of project management experience, or
- Secondary degree (high school diploma, associate's degree or the global equivalent) and 60 months of project management experience, and
- 35 hours of structured project management training (this program meets that criteria)

It is recommended that you obtain PMI's membership prior to the program start. This provides access to a soft copy of the Project Management Body of Knowledge (PMBOK)

You are responsible to personally apply, schedule, and pay for your PMP examination, which has a fee of \$555 USD (\$405 USD for members)
